In behavioral psychology, reinforcement is a consequence applied that will strengthen an organism's future behavior whenever that behavior is preceded by a specific antecedent stimulus. This strengthening effect may be measured as a higher frequency of behavior (e.g., pulling a lever more frequently), longer duration (e.g., pulling a lever for longer periods of time), greater magnitude (e.g ...

An important quality of human society is that people work together in socially coordinated and cooperative ways. To organize a government, to build a business, to develop a scientific theory, or to create a new technology often requires the efforts of many people devoted to a common objective.

Cues of working together fuel intrinsic motivation

If you assume, as we do, that providing a good work experience is truly a significant source of competitive advantage (pdf) for business and government because it leads to better performance and better outcomes — maybe the best source of advantage in a world of complex human-machine interaction — then it is clear that most enterprises need to put considerably more effort into it.
