Rework, Modification and Repair of Electronic Assemblies

The Expert 10.6 rework stations facilitate the reliable and precise rework of BGA-, CSP-, and QFN-components, connectors and sockets. Innovative technologies such as “Advanced Vision Placement”, Hybrid Heating Technology and the intuitively operated “Easy Solder” software ensure safe soldering and de-soldering without the intervention of operators in the soldering process.

Surface-mount technology (SMT) is a method for producing electronic circuits in which the components are mounted or placed directly onto the surface of printed circuit boards (PCBs). An electronic device so made is called a surface-mount device (SMD).In industry, it has largely replaced the through-hole technology construction method of fitting components with wire leads into holes in the ...
