Calluna vulgaris (known as common heather, ling, or simply heather) is the sole species in the genus *Calluna* in the flowering plant family Ericaceae. It is a low-growing perennial shrub growing to 20 to 50 centimetres (7.9 to 19.7 in) tall, or rarely to 1 metre (39 in) and taller, and is found widely in Europe and Asia Minor on acidic soils in open sunny situations and in moderate shade.

Calluna - Wikipedia

Heuchera / ˈhjuːkər / is a genus of evergreen, herbaceous perennial plants in the family Saxifragaceae, all native to North America. Common names include alumroot and coral bells.
