So for our Polaris mission, basic deltaV for Terra escape or capture: 11,180 m/s, basic deltaV for Mars escape or capture: 5030 m/s. Please note that  $\Delta v_{esc}$  already includes the deltaV for  $\Delta v_{vo}$ . In other words, when figuring the total deltaV for a given mission, you will add in either  $\Delta v_{esc}$  or  $\Delta v_{vo}$ , but not both. Use  $\Delta v_{vo}$  for surface-to-orbit missions and use  $\Delta v_{esc}$  for planet-to-planet missions

### Missions - Atomic Rockets

Space Shuttle abort modes were procedures by which the nominal launch of the NASA Space Shuttle could be terminated. A pad abort occurred after ignition of the shuttle's main engines but prior to liftoff. An abort during ascent that would result in the orbiter returning to a runway or to a lower than planned orbit was called an "intact abort", while an abort in which the orbiter would be ...

### Space Shuttle abort modes - Wikipedia

As the delta-V for a mission goes up, the amount of propellant required goes up exponentially (or looking at it another way: the amount of payload shrinks exponentially). Large amounts of propellant are expensive, but the higher the mass-ratio the higher the likelihood that the spacecraft will not be reusable.

### Infrastructure - Atomic Rockets

Late in the evening, a second rocket was shot down over Tel Aviv. Following this air sirens went off in Binyamina and Hamas stated that a rocket was fired at Haifa. This was all followed by several rockets being fired at Jerusalem and two landing just outside Jerusalem. Just before midnight, a rocket hit Hadera, 28 miles (45 km) north of Tel Aviv, making it the longest range rocket ever shot ...

Time for a new one! From an article from almost 8 months ago regarding Hillary:. The good news is that as this progression dissipates, there is a steady flow of Jupiter transits in 2016, supported by a strengthening of Hillary's Venus throughout the year, that together portend a strong possibility of victory in the next election.
