Ripening is a process in fruits that causes them to become more palatable. In general, fruit becomes sweeter, less green (typically "redder"), and softer as it ripens. Even though the acidity of fruit increases as it ripens, the higher acidity level does not make the fruit seem tarter. This is attributed to the Brix-Acid Ratio.

Etymology. The colour orange is named after the appearance of the ripe orange fruit. The word comes from the Old French orange, from the old term for the fruit, pomme d'orange. The French word, in turn, comes from the Italian arancia, based on Arabic n?ranj, derived from the Sanskrit naranga. The first recorded use of orange as a colour name in English was in 1512, in a will now filed with the ...

31 January 2019 - Today the CBI is publishing the first in a series of reports in 2019 on the apprenticeships and skills system. Getting Apprenticeships Right: Next Steps is a business-backed blueprint that recommends that the Government gives the Institute for Apprenticeships (IfA) the independence and clout it needs to reform and regulate the English skills system.
