The Annals of Robotic and Innovative Surgery is dedicated to the humane and ethical conduct of all studies involving living subjects. When reporting studies that involve human participants, human data or human tissue, authors must provide an ethics statement. The statement must include the ethics approval and consent (even where the need for approval was waived) and the name of ethics ...

:: ARIS :: Annals of Robotic and Innovative Surgery

x Neuroblastoma is an embryonic cancer arising from neural crest stem cells. This cancer is the most common malignancy in infants and the most common extracranial solid tumor in children. The clinical course may be highly variable with the possibility of spontaneous regression in the youngest patients and increased risk of aggressive disease in older children.

Memorial Hermann Health System's Financial Assistance Policy and Admissions Policy govern how financial assistance is provided. On the basis of these policies, a determination will be made regarding a patient's eligibility for financial assistance. Payment from all other possible payment sources must be exhausted before a patient can be considered for the financial assistance program.

Ileostomy formation. This is an operation to create a stoma or an opening in the ileum (last part of the small intestine), which is stitched to the skin.

Ileostomy formation | Birmingham Bowel Clinic

Ileocolic Resection. This is an operation to remove the terminal ileum, the last part of the small intestine and first part of the colon. It is usually performed for conditions such as Crohn's disease which affects the terminal ileum and first part of the colon. In most cases the operation can be performed via a laparoscopic (keyhole) surgical technique.
