Fig. 1. The robot reasons and acts in domestic interaction scenarios. The sources of information are multi-modal dialogue (A) and perspective-aware monitoring of the environment and human activity (B).The robot must adapt on-line its behaviours by merging computed plans (C) with reactive control. The robot explicitly reasons on the fact that it is (or is not) observed by the human.

Artificial cognition for social human–robot interaction

Abstract Sometimes engineers get ideas to build robots from animals in nature. There are robot dogs, robot snakes, robot birds, robot cheetahs, and even tiny robotic insects!
