CS 229: Machine Learning Final Projects, Autumn 2013

Face perception is an individual's understanding and interpretation of the face, particularly the human face, especially in relation to the associated information processing in the brain.. The proportions and expressions of the human face are important to identify origin, emotional tendencies, health qualities, and some social information.

The purpose of this page is to provide resources in the rapidly growing area of computer-based statistical data analysis. This site provides a web-enhanced course on various topics in statistical data analysis, including SPSS and SAS program listings and introductory routines. Topics include questionnaire design and survey sampling, forecasting techniques, computational tools and demonstrations.

The Incredible Years® Parenting Programs. There are separate parent programs for babies (0-1 year), toddlers (1-3 years), preschoolers (3-6 years) and school age children (6-12 years). The parent programs focus on strengthening parent-child interactions and attachment, reducing harsh discipline and fostering parents' ability to promote children's social, emotional, and language development.
