Shale gas is mostly composed of methane. Methane is 'natural gas' and is the gas used to generate electricity and for domestic heating and cooking. Shale gas is produced using technologies developed since the 1980s that enable gas to be recovered from rocks (mostly shale) which were previously considered to be unsuitable for extracting gas.

The secondary science program is guided by the vision that all students have the opportunity to develop scientific literacy. The goal of scientific literacy is to develop the science-related knowledge, skills and attitudes that students need to solve problems and make decisions, and at the same time help them become lifelong learners - maintaining their sense of wonder about the world around them.

The Scroll & Seven Seals. Before I get into the details, we must define what the seals are all about. Revelation 5:1-10 And I saw in the right hand of him that sat on the throne a scroll written within and on the backside, sealed with seven seals. And I saw a strong angel proclaiming with a loud voice, Who is worthy to open the scroll, and to loose the seals thereof?

The Seven Seals, Trumpets, and Bowls

Anglesey (Môn) is the largest of the Welsh islands, situated in the north west corner of Wales. This internationally recognised

Geopark covers some 720 square kilometres and has 201 kilometres of coastline.
