Biopharmaceuticals from microorganisms: from production to

Biopharmaceuticals produced by microorganisms Bacteria. The use of protein biopharmaceuticals in human health dates from the 19th century with the use of diphtheria antitoxin therapy. 31 The antidote consists of immunoglobulins extracted from the serum of immunized animals that recognize and neutralize the toxin (e.g., horse or sheep).31, 32 In fact, several antitoxins are available to treat ...

Biopharmaceuticals from microorganisms: from production to

Die CML hat eine Inzidenz von etwa 1,6 Neuerkrankungen pro 100.000 Erwachsenen im Jahr und macht etwa 20 Prozent aller Leukämien aus. Sie ist ganz überwiegend eine Erkrankung des Erwachsenenalters und weist eine stetige Zunahme mit zunehmendem Alter auf. Männer sind etwa 1,4-mal häufiger betroffen als Frauen.

Chronische myeloische Leukämie – Wikipedia

PEGylation enhances the therapeutic efficacy of the drugs by bringing in several advantageous modifications over the non-PEGylated products. The systematic classification is illustrated in Fig. 2. Increase in the serum half-life of the conjugate is the major way of enhancing therapeutic potential of the PEGylated conjugate.
