Highlights Observer and victim characteristics influence rape victim blaming. RMA, gender role conformity and substance use influence rape victim blame. Men demonstrate higher RMA and higher levels of victim blaming than women. Women who violate traditional gender roles are attributed more blame. Intoxicated victims are blamed more than sober victims.

This is the third of three lessons that address gender stereotypes. The objective of these lessons is to encourage students to develop their own critical intelligence with regard to culturally inherited stereotypes, and to the images presented in the media - film and television, rock music, newspapers and magazines.

### **The Impact of Gender Stereotypes - Lesson | MediaSmarts**

This lesson familiarises students with stereotypes and helps them understand the role that stereotypes play in television's portrayal of life. The lesson begins with a discussion about the types of stereotypes that are common on television, why stereotypes are used on TV, and the possible negative ...
